

# Call For Papers

## Fourth International Conference on Networked Sensing Systems (INSS 2007)

June 6-8, 2007

Braunschweig, Germany http://www.inss-conf.org Sponsored by Transducer Research Foundation

## Organization

#### General Co-chairs:

Michael Beigl, University of Braunschweig, Germany Shuichi Shoji, Waseda University, Japan

#### TRF Liason:

Richard S. Muller, University of California, Berkeley, USA

## Program Chair:

Hideyuki Nakashima, Future University-Hakodate, Japan

## Program Vice-chairs:

Tian He, University of Minnesota, USA Yoshito Tobe, Tokyo Denki University, Japan Harri Kopola, VTT, Finland

## Publicity Co-chairs:

Suzumu Ishihara, Shizuoka University, Japan Koen Langendoen, Delft University of Technology, The Netherlands Darrin Young, Case Western Reserve University, USA

#### Posters chair:

Albert Krohn, University of Karlsruhe, Germany

#### Demonstrations chair:

Jin Nakazawa, Keio University, Japan

## Program Committee:

Program Committee:

Tarek Abdelzaher, University of Illinois at Urbana-Champaign, USA Shigeru Ando, University of Tokyo, Japan Jo De Boeck, Holst Centre, IMEC-Netherlands, The Netherlands Michael Beigl, University of Braunschweig, Germany Jan Beutel, ETH Zurich, Switzerland Steven Garverick, Case Western Reserve University, USA Mike Hazas, Lancaster University, UK Juhani Hirvonen, VTT, Finland Satoshi Honda, Keio University, Japan Hidekata Hontani, Nagoya Institute of Technology, Japan Hidekata Hontani, Nagoya Institute of Technology, Japan Hideywik Kawashima, Keio University, Japan Albert Krohn, University of Tokyo, Japan Hideywik Kawashima, Keio University, Japan Albert Krohn, University of Karlsruhe, Germany Narito Kurata, Kajima, Japan Satoshi Kurihara, Osaka University, Japan Koen Langendoen, Delft University, Japan Koen Langendoen, Delft University of Technology, The Netherlands Marc Langheinrich, ETH Zurich, Switzerland Hyunyoung Lee, University of Denver, USA Pedram Mohseni, Case Western Reserve University, USA José Moura, Carnegie Mellon University, USA Takuichi Nishimura, Advanced Industrial Science and Technology, Japan Joseph Paradiso, Massachusetts Institute of Technology, USA Japan
Joseph Paradiso, Massachusetts Institute of Technology, USA
Marcelo Pias, University of Cambridge, UK
Susanna Pirttikangas, University of Oulu, Finland
Kay Roemer, ETH Zurich, Switzerland
Shoichi Sakane, Yokogawa Electric, Japan
Shuichi Shoji, Waseda University, Japan
Gregor Schiele, University of Mannheim, Germany
Sang Hyuk Son, University of Virginia, USA
John Stankovic, University Virginia, USA
Norman Tien, Case Western Reserve University, USA
Darrin Young, Case Western Reserve University, USA

## Steering Committee

## Co-chairs:

Shigeru Ando, University of Tokyo, Japan Norman Tien, Case Western Reserve University, USA

## Members:

Michael Beigl, University of Braunschweig, Germany Paul J. M. Havinga, University of Twente, The Netherlands Satoshi Honda, Keio University, Japan Hidekata Hontani, Nagoya Institute of Technology, Japan Hideto Iwaoka, Kanazawa Institute of Technology, Japan Marc Langheinrich, ETH Zurich, Switzerland Sang Hyuk Son, University of Virginia, USA Yoshito Tobe, Tokyo Denki University, Japan Darrin Young, Case Western Reserve University, USA

During the past years, the International Conference on Networked Sensing Systems (INSS) has established itself as THE scientific event where academic and industrial experts from the areas of sensor systems, wireless networks, and applications on sensor networks come together. The INSS provides a forum to hear about the hottest developments in these areas, to exchange ideas, and to start up collaborations within these fields and between industry and academia.

INSS 2007 is the fourth annual Conference in the series, and features a highly selective, singletrack technical program. We invite outstanding research papers from the field of sensor technology, wireless networking, or application of networked sensor systems. The Conference especially encourages submissions that investigate research issues shared between all three areas.

Topics include but are not limited to:

- Applications of Networked Sensing Systems
- Prototypes, Field Studies, and Testbeds for Networked Sensing Systems
- Security for Networked Sensing Systems
- Data Management for Networked Sensing Systems
- Middleware for Networked Sensing Systems
- Communication Protocols
- Sensor Phenomena and Modeling
- Sensors and Sensing Systems
- Materials, Fabrication, and Packaging of Sensors

INSS 2007 invites the submission of both regular and Birds-of-a-Feather (BoF) papers. Regular papers must be no more than 8 two-column pages (minimum 4 pages) long and include an abstract of 100 - 150 words. BoF papers must be no more than 4 two-column pages long and include an abstract of 100 -150 words. BoF papers are suitable for interactive discussions; the presenters of accepted BoF papers are given short oral presentation times and poster space for discussions.

INSS 2007 is specifically seeking papers that are of interest to the interdisciplinary community represented at the Conference. All submissions will be peer-reviewed and evaluated on the basis of originality, significance of contribution, technical correctness, and presentation. Papers submitted must not be under simultaneous review for any other Conference, journal, workshop, or other publication. Papers should be formatted according to the "IEEE transactions" format - see the Conference Web site for details. Accepted papers will be included in the Conference proceedings. Authors are required to attend the Conference to present their work.

## Important Dates

Conference Dates:

Paper Submission Deadline: December 16, 2006 (extended) Notification of Acceptance: February 5, 2007 Camera-Ready Papers: March 15, 2007 June 6 - 8, 2007
